Self-Aligning Pads • self-resetting

Product Description

Self-aligning pads are used as stop, support and thrust pad and are suitable for installation in clamping elements.

By resetting to the parallel position the contact point of the self-aligning pad provides a defined initial position, thus preventing the pad clamping in an oblique position when inserting the workpiece.

Material

Spring element

· Thermoplastic PUR

- Ball-bearing steel, hardened, bright
- · Stainless steel 1.3541, nickel-plated

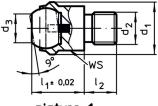

- · Heat-treated steel, tempered, phosphated
- · Stainless steel 1.4057, heat-treated

More information

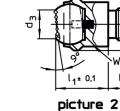

Notes

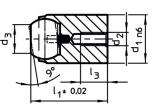

Ball protected against rotating. Loading capacity valid for steel and stainless steel designs.
